Adaptarea la realitate presupune o bună cunoaștere de sine, capacitatea de a ne analiza aptitudinile și de a evalua situațiile cu care ne confruntăm. În dobândirea și exersarea acestor abilități, psihologia, cu mijloacele specifice de investigație și puterea de interpretare, joacă un rol decisiv. Psihologia vârștelor permite înțelegerea comportamentelor și atitudinilor prin corelarea unor date specifice diverselor stadii de dezvoltare psihică. Axat în principal pe psihologia copilului și adolescentului, volumul are avantajul unei viziuni unitare asupra transformărilor psihice de-a lungul întregii vieți. O lectură utilă pentru specialiști și studenții care se pregătesc să lucreze în domeniu, dar și pentru părinții interesați de particularitățile dezvoltării copilului.
